

- The Decal is embedded in an A4 paper. This can be fed into a normal LaserJet printer to print the custom information of the vehicle being processed.
- The embedded Decal is located at the Down Right corner of the paper.
- Approximate dimension of each decal is **70mm** high and **50mm** wide.
- Other space on the A4 paper can be used to print the decal usage instruction and other related information.
- There is cut out dotted line demarcating the Decal from the other part of the A4 paper.
- The Decal has **10mm** thick adhesive border for sticking the Decal on the windshield (inside the Vehicle).
- The background should not be plane. If possible, it should come with some security features.
- All embedded Decals come with pre assigned serial number and equivalent QR code as described in the illustration above.
- Vehicle registration number, color and brand name will be entered as specified before printing.
- The Decal is similar to a Vehicle License Decal.
- Two Decals to be embedded on a single A4 paper.
- The diagram above shows the description and sample of a cut out Decal.
